USB 3.0 SuperSpeed: Enhanced Data Transfer, Power Efficiency and Charging

The next generation of the ubiquitous Universal Serial Bus connectivity standard, SuperSpeed USB 3.0 addresses today’s need for more rapid data transfer, offering greater productivity and user satisfaction with high-bandwidth applications and peripherals.

USB 3.0 Benefits

- **Ten times faster data transfer**
  Ten times faster than USB 2.0, USB 3.0 achieves its super-speedy data throughput (max. 4.8 GB) through technical improvements to the bus architecture.

- **Greater power efficiency**
  New interrupt-based data signaling eliminates the power drain associated with USB 2.0.

- **Increased power output / greater charging capabilities**
  USB 3.0 substantially boosts power output over USB 2.0, enabling users to power and charge more devices.
Setup Tips: Ensure laptop has internet connection prior to installation to guarantee required driver updates.

**Windows® XP/ Windows Vista® Setup**

Note: Do not connect the Docking Station prior to installing the DisplayLink Driver.

1. Install the included Driver CD
2. Double click on Setup.exe
3. Follow the on-screen instructions until the installation is complete
4. Connect the Docking Station and peripherals

**Windows® 7 / Windows® 8 Setup**

1. Connect the Docking Station to your laptop
2. Windows will start installing the DisplayLink Driver automatically
   
   NOTE: If the driver installation does not automatically start, disconnect the docking station from your laptop, insert the Driver CD, and click on the Setup.exe file.
3. Follow the on-screen instructions until the installation is complete
4. Connect all peripheral devices
